REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Prior arts of record do not disclose a method and device disclosed in claims 14-15, and 20 for aiding driving of an aircraft running over a runway in an acceleration phase with a view to take off to allow the pilot to ascertain up to what moment the take off may be interrupted without risk of overshooting the end of the runway, the method comprises: determining the speed and deceleration the aircraft; calculating distance to be traveled on the ground by the aircraft to stop; presenting the distance and the stopping position to a driver of the aircraft with the aid of a head up display; the head up display displays a symbol on the windscreen of the aircraft such that the symbol is visually projected at the calculated stopping position of the aircraft in the pilot's view of the runway and of its end so that the pilot can determine up to what moment the takeoff may be interrupted without risk of overshooting the runway. Claims 15 discloses the above subject matter, claim 20 discloses the device performing the method of claims 14 and 15.

Although Weiss teaches a motivation for displaying symbols, graphical, etc. on the field of view of the pilot, Weiss does not obviously teach a motivation for displaying the symbol at the calculated stopping position of the aircraft in the pilot view of the runway and of its ends so that the pilot may determine up to what moment the take off may be interrupted without risk of overshooting the runway.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the
